[25th February 1961

Mainly owing to the delayed action on the part of the agriculturist in Usilampatti area in tackling this pest at the vulnerable stage and the unwillingness on the part of a number of ryots to adopt the departmental recommendations, the control measures actually carrried out have become ineffective. Good progress was shown wherever there was public co-operation in controlling this pest.

The area affected has been approximately estimated at 6 to 10 per cent and the loss in crop has been estimated approximately at 2 per cent.

APPENDIX II.

[Vide answer to starred question No. 489 asked by Sri K. R. Viswanathan at the meeting of the Legislative Assembly held on 25th February 1961, page 514 supra.]
